PROFESSIONAL SUMMARY

Results-oriented Python Full Stack Developer with hands-on internship experience in Django, REST APIs, MySQL, HTML5, CSS3, and JavaScript. Proficient in MVC architecture, CRUD operations, database design, and Agile development workflows. Demonstrated ability to build responsive web applications, integrate RESTful APIs, and deploy scalable backend systems. Seeking an entry-level Software Development role to deliver high-quality, maintainable code and contribute to business growth.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (ES6+)

Frameworks & Libraries: Django, Django REST Framework, Bootstrap 5, Pandas, NumPy, Scikit-learn, Matplotlib

Web Technologies: HTML5, CSS3, Responsive Web Design, REST API, API Integration, Serializers

Databases: MySQL, PostgreSQL, Oracle SQL, CRUD Operations, Database Design, ORM

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Postman, Virtual Environment (venv), Linux/Ubuntu

Concepts: OOP, MVC Architecture, DBMS, Agile/Scrum, Unit Testing (pytest), CI/CD basics, Data Structures

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern | QSpiders / PySpiders, Mysuru

Feb 2026 – May 2026 (4 Months)

- Developed 3+ responsive web applications using Django MVC framework, HTML5, CSS3, Bootstrap, and JavaScript, reducing front-end rendering time by approximately 25%.
- Designed and implemented MySQL database schemas with 10+ relational tables; wrote optimized SQL queries for data filtering, search, and pagination using Django ORM.
- Built and tested RESTful APIs using Django REST Framework, implementing serializers, CRUD endpoints, and JWT-based authentication for secure data exchange.
- Executed unit testing and debugging using pytest; identified and resolved 15+ functional bugs, improving overall application stability and user experience.
- Collaborated on version control using Git and GitHub across a team of 5, following Agile/Scrum sprint cycles with daily stand-ups and bi-weekly code reviews.

PROJECTS

Lung Cancer Prediction using Machine Learning | Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Jupyter Notebook

- Built a supervised machine learning classification model achieving 92% prediction accuracy on a dataset of 1,000+ patient health and lifestyle records.
- Performed end-to-end data preprocessing, feature selection, and exploratory data analysis (EDA) using Pandas and Matplotlib, improving data quality by 30%.
- Evaluated 4 ML algorithms (Logistic Regression, Decision Tree, Random Forest, SVM) and selected the best-performing model based on precision, recall, and F1-score metrics.

Cricket Analysis Web Application using django | Tech Stack: Django, MySQL, HTML5, CSS3, JavaScript, Bootstrap, REST API

- Developed a full-stack Django web application with MySQL backend to manage and display player, team, and match statistics for 500+ cricket records.
- Designed normalized relational database models; implemented CRUD operations, advanced data filtering, search functionality, and paginated API responses using Django REST Framework.
- Integrated dynamic front-end interfaces using HTML5, CSS3, Bootstrap, and JavaScript; deployed application on a local Linux server and documented REST API endpoints via Postman.

EDUCATION

B.E. in Computer Science and Engineering | CGPA: 7.9/10

2023 – 2026

Government Engineering College, Kushalanagar

Diploma in Electronics and Communication | CGPA: 8.5/10

2023

JSS Polytechnic, Nanjangud

CERTIFICATIONS

- Python Full Stack Development — QSpiders / PySpiders (2026)
- Python Fundamentals — Infosys Springboard
- Git & GitHub Version Control — (Self-directed, verified via GitHub profile)
